

Exhibit 2

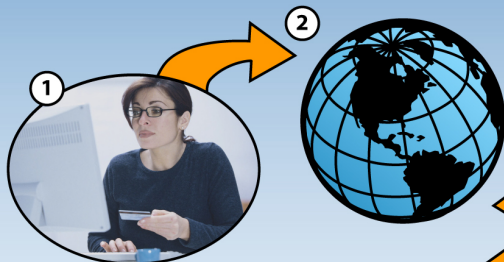

Reliability and Security

Intelligent and sophisticated monitoring with alert notification 24x7x365 response by our network and development staff, and managed security through daily automated backups, ensured data integrity and restore, and customized firewall scheme with secured ports and servers.

MAXEXP[®]

eCommerce Infrastructure

Production Environment

Intrusion Protection

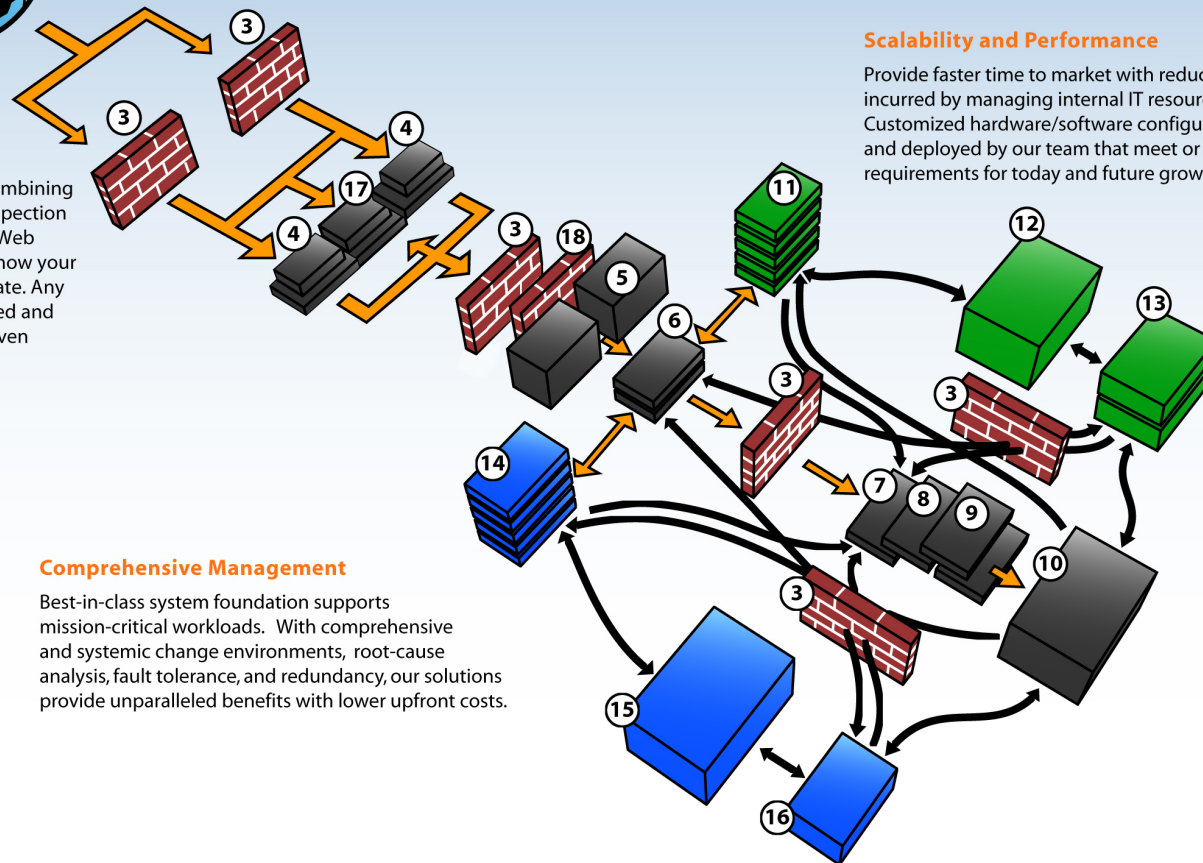

Maintain peace of mind, and PCI Compliance, by combining sophisticated technologies, such as Transparent Inspection and Dynamic Profiling. The Imperva SecureSphere Web Application Firewall has an intimate knowledge of how your web site and the MaxEXP eCommerce system operate. Any extraordinary or suspicious activity is easily identified and thwarted automatically before the malicious user even gets started.

Single Source Accountability

We provide end-to-end solutions for design, Quality Assurance, and production for the MaxEXP enabled eBusiness platform through a dedicated team that provides total support within a variety of services which include creative, consulting, development, and marketing.

Scalability and Performance

Provide faster time to market with reduced expenses incurred by managing internal IT resources and infrastructure. Customized hardware/software configurations is purchased and deployed by our team that meet or exceeds client requirements for today and future growth.

Comprehensive Management

Best-in-class system foundation supports mission-critical workloads. With comprehensive and systemic change environments, root-cause analysis, fault tolerance, and redundancy, our solutions provide unparalleled benefits with lower upfront costs.
